GitHub Questions to Discuss

1. Will you use issues or milestones in GitHub? Or keep all of that in PIvotal Tracker?
   a. *Yes, we are using Github*
2. Master branch is the main branch? Some other branch is what is deployed as production?
   a. *Yes master branch is main branch, only merge PR's into master after code review and CI tests pass*
3. What will be your branch naming convention?
   a. Will you have any?
      i. *name/feature-name*
   b. Require a username is in the branch name, so everyone knows who owns it?
      i. *yes*
   c. Include keywords like: feature, bug, fix, wip (work-in-progress)
      i. *We will use actual feature name (bug fixes will use fix, and wip)*
      ii. ** Note: more important to include these in commit message*
4. What is the unit of a commit?
   a. A single feature?
   b. A lot of tiny changes?
   c. **It doesn't matter? And then squash commits before merging**
5. What will be the workflow of branches?
   a. Have a work-in-progress branch first with whatever commits as desired. Then when ready for a PR, branch to create a non-work-in-progress branch, squash commits, and then push to repo for the PR?
   b. **Just create a branch for each feature and squash as necessary?**
6. Rebasing, merging, squashing?
   a. **Thou shalt always rebase? yes**
   b. Thou may rebase or merge as thou see fit? Only after LGTM from other team member
   c. **Thou must squash before putting things in master? yes**
